TESTIMONIAL

José Eduardo Malo

My experience during the IPADE's admission process was first class. At all time I received excellent attention from the admissions team and the people involved. Initially I contacted them by email. Within 24 hours I was contacted by the admissions team, who were my right hand during the whole process, facilitating the process with outstanding care. All my doubts were immediately clarified. Some time later I was extended an invitation to the Monterrey campus to take my admission exam, get to know the facilities, and familiarize myself with the system. The experience could not have been better. I left convinced and determined that IPADE's Full-Time MBA was exactly what I was looking for. This visit along with my experience throughout the process were the determining factors in my decision. Something unforgettable and for which I will always be grateful.

WORK PLACEMENT TESTIMONIAL

María Fernanda Ramírez

Thanks to IPADE I developed fundamental skills to transform myself into a leader; such as analytical skills, teamwork, knowledge in different areas, the importance of the human factor, values such as ethics and responsibility, among others. All this allowed me to turn my professional career around, having worked prior to the MBA in Texas and currently I am in the area of Operational Strategy at Walmart Corporate; I have faced several challenges, however, learning the case method has been a fundamental factor to be able to face them having a more comprehensive and analytical profile, and thus make better decisions.

"I found IPADE by going through a ranking of the top 100 global MBA programs and was searching for a 2-year option that offers a strong international perspective. The excellent attention from staff in combination with the positive side effect of being able to improve my Spanish by living in Mexico City convinced me to choose to study here. After finishing the first two semesters, I can say that I'm very happy with my choice and can fully recommend the business school for several reasons. Firstly, the academic level is obviously world-class competitive, as indicated by the position in well known global MBA rankings and being triple crown accredited. A lot of important companies actively recruit from the school as a result of this. Other reasons that make studying at IPADE an excellent experience are the warm and helpful Mexican culture and the livability of Mexico City, with an almost unlimited option of things to do in your free time. Finally, a very attractive differentiator of the IPADE MBA, is the strong focus on teaching and promoting highly ethical and sustainable management practices. I think there are very few, if any, comparably dedicated programs to these values.

It was IPADE that helped me make the decision to do the MBA, I remember that they told me "no one with talent is left without entering IPADE because of economic resources". They facilitated and guided me at all times to be able to obtain as many scholarships and loans as were available, after that it was all in my hands. IPADE opened many opportunities for me and gave me the tools to get an incredible job at Grupo Modelo, I was able to increase my income considerably compared to my previous job and I finished paying off all the financing in less than a year. Undoubtedly it was worth the adventure, what at one point seemed to be a big risk ended up becoming a motivating and driving factor to move forward and stand out.
